MARKET PRICE PREDICTOR

DATA COLLECTION

API and request pulled from LiveCoinWatch

- Sends request to LiveCoinWatch API
- Retrieves real-time market data of XRP
- Converts JSON into a Python dictionary
- Display details from JSON

=== Current Conditions ===

Snapshot #: 1

Current Date-Time: 2026-05-03 16:09:25.749272

Price: \$1.3942

Volume: 861.727M

Market Cap: \$86.2B

Liquidity: 290511421

=== Price Changes ===

Daily: +0.12%

Weekly: -2.50%

Monthly: +5.73%

== Exporting to csv file ==

Data saved to xrp_market_data.csv...

Waiting 60 seconds to receive & append additional data

DATA STORAGE

- Extracts key values from API response to .csv file.
- Converts price changes to percentage.
- Appends each snapshot to .csv file.

VISUALIZATION

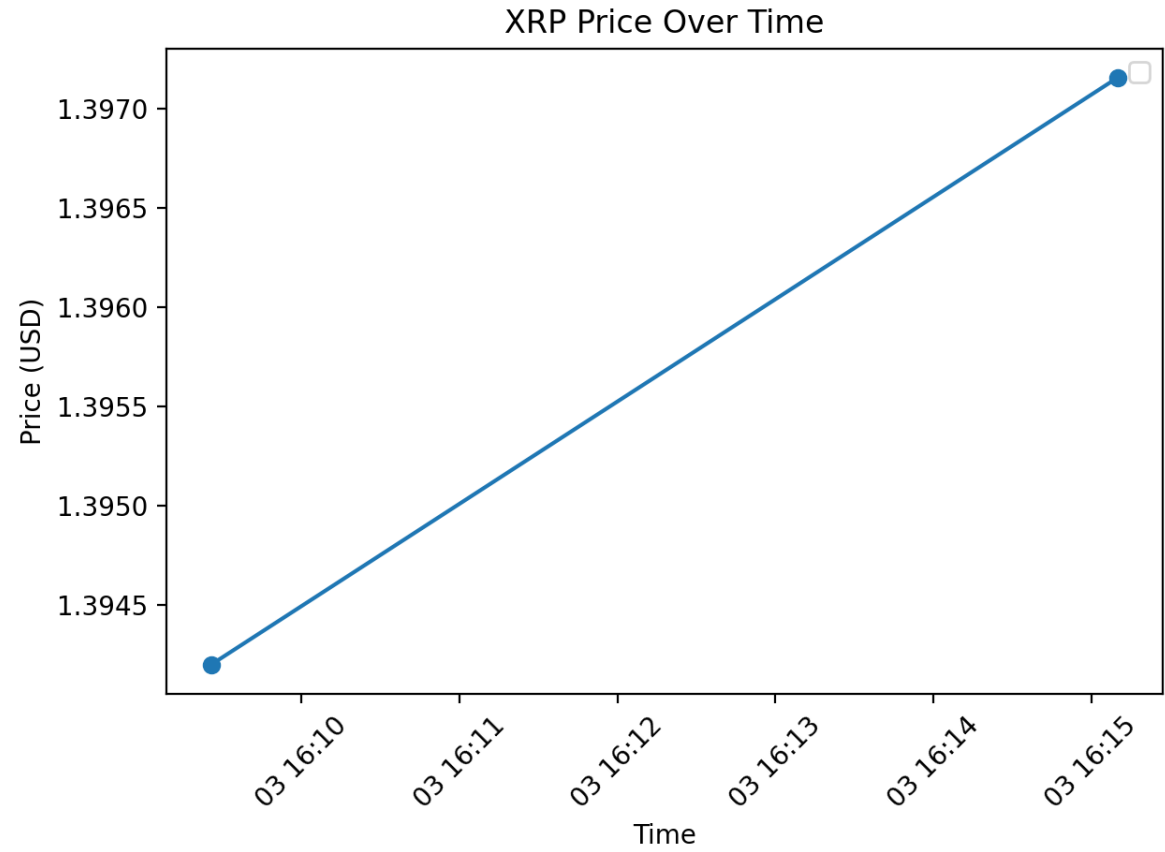

Read .csv file
using pandas

Price plotted
per market
snapshot

Chart
updated every
60 seconds

VISUALIZATION

- Each point represent a timestamp of live market data
- The line displays how XRP price changes over time
- Price trend shows as more data is collected

PREDICTION LOGIC

Predicted next price: \$1.3964

- Uses last 5 data points
- Applies NumPy linear regression
- Predicts next 'local' price.
